

Premium Portable floor stand for displays up to 90 kg
 Fits displays with VESA sizes up to 800 x 600 mm
 For 55-100" Displays (subject to VESA pattern and weight limit)
 Height adjustable by hand crank
 Premium 4" wheels
 Extra wide shelf

The Vision F27 floor stand is like the standard F25 but elevates with a premium aluminium column and better components which enhance rigidity. It has a large bottom shelf, suited to accommodating Zoom and Teams video bars. Height-adjustment is with a simple-to-use hand crank, and it comes complete with all required components and offers an unparalleled lifetime warranty.

These elegant floor stands are ideal for AV rentals, event centres, meeting room facilities, boardrooms, schools, or any setting where large format displays are used across various meeting areas.

SWL 90 kg (198 lbs)

The sturdy steel frame can support displays that weigh up to 90 kilograms.

55-100" Displays

The suitability of a stand is also determined by the weight of the display and the dimensions of the mounting points. Displays that weigh under 90 kg and have a VESA pattern up to 800 x 600 mm are compatible with this stand.

Premium 4" Wheels

The 4-inch (100 mm) casters ensure the cart glides easily over thick carpet and minimizes vibration to sensitive electronic equipment. All four wheels can lock.

Adjustable Height

Turn the crank handle located at the side of the column to adjust the display height by 400 mm (16 inches).

Tilt

The VESA mount is adjustable and can be tilted downwards to prevent reflections from overhead lighting.

Conference Bar Shelf

The generous bottom shelf, measuring 800 mm (32 inches) in width and 250 mm (10 inches) in depth, is designed to accommodate Teams or Zoom video bars beneath the display. It can also serve as a convenient place for laptops.

Camera Shelf

The cart includes a small top shelf for a video conference camera above the display. Both shelves are height adjustable.

Mini PC Mount

VESA100 mounting holes and M4 stand-offs are provided, allowing for attachment of a mini-PC, such as a Dell Optiplex or Intel NUC, to the VESA mount behind the display.

Cable Management

Vision considers every detail! Included are stick-on cable clips that allow for discreet cable routing up the column.

Feet Included

To convert the F27 into a non-portable floor stand fit the included feet, instead of the wheels.

Wall Brackets

Parts are included to transform the F27 into a wall-fixing floor stand. It comes with two wall brackets, and the provided feet are useful for levelling.
